Dvir Haham Pour

+972-50-9507992 | Dvir.hahampour@gmail.com | Portfolio | LinkedIn | GitHub

Summary

Software Engineer (B.Sc. CS) with a strong backend foundation, building end-to-end systems from infrastructure to production. Experienced in distributed architectures, reliable data synchronization, and CI/CD, with hands-on experience in LLM applications and agentic systems. Comfortable working across the stack and collaborating closely with product stakeholders.

Skills & Languages

Technical Skills: Node.js, TypeScript, JavaScript, NestJS, Express, REST APIs, Socket.IO, PostgreSQL, Prisma, SQL, Redis, AWS, Docker, Kubernetes, CI/CD, Git, Angular, React.

AI & LLM: RAG, AI Agents, LLM APIs, Embeddings, Vector Search, Claude Code, Codex, GitHub Copilot.

Languages: Hebrew (Native), English (Fluent).

Professional Experience

NGSOFT | **Software Engineer** | 2025 – 2026

- Developed end-to-end systems with NestJS on AWS and Kubernetes, integrating REST APIs, real-time Socket.IO communication, Redis Pub/Sub for cross-instance events, PostgreSQL, and an Angular frontend.
- Architected a shared TypeScript library unifying logging and secure cross-network file exchange across multiple independent backend applications, establishing a consistent engineering standard where none existed.
- Redesigned data synchronization from full to incremental sync, transferring only changed records and retrying unacknowledged records to ensure reliable delivery across isolated networks.
- Built and maintained CI/CD pipelines for Docker-based deployments on Kubernetes, integrating database migrations through init containers.
- Established an AI-assisted development workflow using coding agents, embedding architectural context, coding standards, and project conventions to improve implementation quality, code reviews, and developer onboarding.

Projects

Possbo | Full-Stack SaaS & AI Platform | Pre-production | 2026 – Present

- Designed and built an end-to-end SaaS web application for social media content and campaign management using React, TypeScript, Node.js, PostgreSQL, and Prisma.
- Implemented scheduled publishing, third-party integrations (Facebook, Instagram, WhatsApp), and AI - powered content generation.
- Led system architecture and drove implementation through an AI-assisted, spec-driven workflow using Claude Code and Codex.

Education

The Open University of Israel | Bachelor of Science (B.Sc.) in Computer Science | 2022 – 2025

- Strong foundation in algorithms, data structures, software engineering, and computer systems.

Military Service

Meitav Unit | **IT Systems Support Technician** | 2018 – 2020

- Provided technical support and maintained IT infrastructure and systems.
